when the birth of fascist ideology was first published in 1989 in france and at the beginning of 1993 in italy it aroused a storm of response positive and negative to zeev sternhell s controversial interpretations in sternhell s view fascism was much more than an episode in the history of italy he argues here that it possessed a coherent ideology with deep roots in european civilization long before fascism became a political force he maintains it was a major cultural phenomenon this important book further asserts that although fascist ideology was grounded in a revolt against the enlightenment it was not a reactionary movement it represented instead an ideological alternative to marxism and liberalism and competed effectively with them by positing a revolt against modernity sternhell argues that the conceptual framework of fascism played an important role in its development building on radical nationalism and an antimaterialist revision of marxism fascism sought to destroy the existing political order and to uproot its theoretical and moral foundations at the same time its proponents wished to preserve all the achievements of modern technology and the advantages of the market economy nevertheless fascism opposed every bourgeois value universalism humanism progress natural rights and equality thus as sternhell shows the fascists adopted the economic aspect of liberalism but completely denied its philosophical principles and the intellectual and moral heritage of modernity
